

INSTRUCTION FOR USE AND
SETTINGS
1770 Micromegas

We congratulate you on the purchase of your timepiece and thank you for your confidence in us.

We hope that it will bring you great satisfaction.

Your Manufacture Royale timepiece requires regular maintenance, which will allow you to guarantee its longevity.

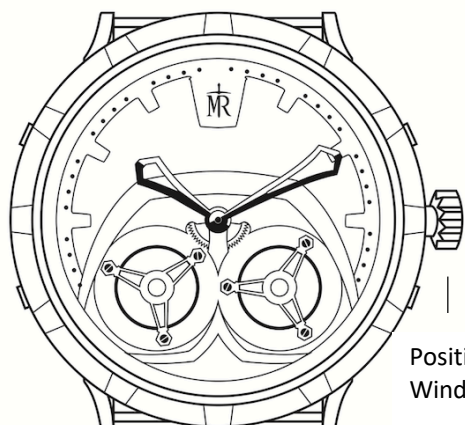

It is recommended to carry out a full service every 3 to 4 years for a watch with mechanical movement, automatic or manual winding.

We recommend that you read the instructions for use, which will provide you with the necessary information for optimal use of your watch.

Precision object

Our master watchmakers have paid the greatest attention to the assembly and adjustment of your watch. Its precision is subject to the influence of earth's attraction, magnetic fields, shocks, as well as the ageing of oils. If you notice any discrepancies in the rate of movement, we recommend that you have your timepiece tested by your authorized Manufacture Royale partner, who will take care to do whatever is necessary to ensure the accuracy of your watch.

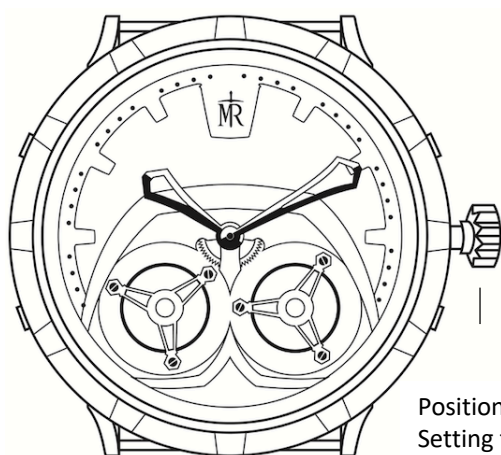

SETTING THE TIME

Position 1 :
Winding

Winding (position 1)

The winding is carried out by turning the crown clockwise. Your timepiece has a power reserve of 40 hours, but we recommend that you wind it up daily to ensure optimal operation

Position 2 :
Setting the
time

Setting the time (position 2)

It is necessary to pull the crown to the right in order to place it in position (2). The setting is made by turning the crown clockwise until the desired hour and minutes are displayed. When the operation is complete, push the crown back to position 1.

Warning - If the part is stopped, at least 20 turns of the crown must be made before setting the time to wind the mechanism and wear it for at least 10 minutes so that the cages synchronize and the torque stabilizers start working.

MOVEMENT CHARACTERISTICS

MR04 automatic mechanical mouvement

Diameter	36mm
Height	8,7mm
Number of rubies	26
Power reserve	40 hours
Frequency	Micro 28.800 vibrations per hour Megas 21'600 vibrations per hour
Display	hours, minutes and double tourbillon

WATER RESISTANCE

Your Manufacture Royale watch is water-resistant to 3bar/atm. It is recommended to use your watch according to its waterproofing characteristics. To protect the movement from moisture, make sure that the crown is always pushed back against the case (position 1), especially after setting the time or adjusting the functions if necessary.

INTERNATIONAL WARRANTY

Conditions of Manufacture Royale International Warranty

The International Warranty below applies to Manufacture Royale brand products sold or presented for repair under the warranty in all countries. Your Manufacture Royale watch is guaranteed against any manufacturing defect for two years from the date of purchase, on the following terms.

To be eligible for the 24-month International Warranty, Manufacture Royale brand products must be purchased exclusively from authorized Manufacture Royale dealers. Maintenance and repair work must also be carried out by an authorized Manufacture Royale dealer. If these conditions are not met, no warranty claims may be made.

Any part found defective due to a manufacturing defect duly noted by our technical services will be repaired or replaced free of charge, at the discretion of Manufacture Royale.

The Manufacture Royale International Warranty is only valid if the warranty card enclosed with the watch in its case is duly completed, dated, with the serial number identified (on the back of your watch) and stamped and signed by the authorized Manufacture Royale dealer who sold you your timepiece.

The following are expressly excluded from the Manufacture Royale International Warranty:

- defects resulting from accidents, improper or abusive use or handling (such as shocks, impact marks, crushing, excessive temperatures, strong magnetic fields)
- unauthorized modification or repair
- the consequences of normal wear and tear and ageing of the watch, strap and crystal
- loss of water resistance after two years from the date of purchase if your watch is waterproof, any defect resulting from contact with water if your watch is not waterproof.
